**ViLabs**

Web Designer & Web Developer

As the only in-house developer and designer, I had a key role in the development of every platform released by ViLabs since late 2012.

My responsibilities included:

- UI/UX design and development
- Frontend development
- Development of a communication layer between WCF and frontend
- Backend development
- WordPress templating
- Logos, web banners, posters and leaflets design
- Promotional videos
- Maintenance
